

The Smooth Collection

The Smooth Collection is offered in Sierra Copper’s exclusive Dark Antique Patina and incorporates most of our hand hammered styles:

- The Hampton single and double bowl farmhouse series, as well as, the Waterbury and Vancouver rounded fronts.
- The Windsor group of single and double bowl kitchen sinks.
- The Bostonian series of bar/prep sinks including the “new” round Bostonian.
- The Chesapeake and Allegany trough sinks.

Vancouver 33 Smooth

Windsor Double 60/40 Smooth

The Limbo Split

Bored with the conventional look and performance of customary double bowl copper sink designs? Tired of trying to place your large pots between the faucet and divider without causing damage to both the faucet and the copper sink's finish? Then..... "Break Up" with the traditional copper sinks offered and increase the functionality of your kitchen with Sierra Copper's new Limbo Split kitchen sinks.

Limbo Split copper sinks incorporate a lower divider that allows you to transition effortlessly from one basin to the other with greater ease and efficiency. Larger pots are no longer a challenge to fill or clean. Your copper sink is now wide open, allowing the freedom of a single basin with the multi task benefits that a double basin affords.

Maintaining the fine craftsmanship of Sierra Copper's experienced artisans, Limbo Split copper sinks are available in both under mount and drop-in applications, in our hand hammered or smooth finishes.

Although available in stock lower dividers of 3/4" and 5", the Sierra Copper Limbo Split divider height may be customized to your specifications.

You decide "how low to go" with the center divide and Sierra Copper will create the perfect partition for your custom copper sink.
